

COVID Vaccination and Update for Paediatric Transplant recipients and their Families

The Australian transplant community is to be congratulated for embracing the need for Covid-19 vaccination and taking individual responsibility for personal safety measures. However, the easing of restrictions is posing new challenges, particularly in NSW and Victoria, and then more broadly as we all move around Australia and abroad.

This important online **WEBINAR meeting hosted by Transplant Australia** for Paediatric transplant recipients, transitioning age groups and their families, will address the questions that need answers.

Key Topics

- **The latest data for Transplant Recipients and Dialysis Patients**
- **Staying safe while re-engaging in life, school, sport and social events with open borders**
- **Additional vaccines and booster shots**

Speakers

Facilitator: A/Professor Natasha Rogers, Westmead Transplant Nephrologist

Panel:

A/Professor Fiona Mackie

- Director of Paediatric Nephrology, Sydney Children's Hospital, Randwick, and TSANZ Councilor
